

CMT20 deployable military container

i-4s.eu

Issued on October 14, 2026

English version

I-4S is proud to introduce its new shelter system : the deployable military container or CMT20 container. Currently in service in the French Armed Forces, the CMT20 deployable containers meet the requirements of command posts, field camps, forward medical posts and field hospitals. With 3 modular extensions, the CMT20 deployable container offers more than 70 m² of useful space and can be connected to more tents (themselves transportable) until the desired surface area is achieved. Ergonomic and robust, the I-4S deployable container will save you valuable time for deployment for short to long term operations.

DIMENSIONS

Floor area	70 m ²	Footprint	2.44 × 6.06 m
Height at the centre	2.59 m
